

CITY COUNCIL.

Meeting of the Municipal Fathers Yesterday.

THE NEW CHARTER ADOPTED.

A Code Which Should Satisfy the People If the Legislature Passes It.

The City Council met in regular session yesterday afternoon, President Reed in the Chair, and all of the members present, excepting Messrs. Kuhn, Johnson, Hyman and Lambie. The minutes of the previous meeting were read and approved.

REPORTS OF CITY OFFICERS.
The City Assessor presented a communication stating that owing to numerous changes in ownership of lands and other causes, it was impossible to make a first-class assessment without proper amount of assistance, and asked that the following gentlemen be appointed deputy assessors, with salary per month to the amount set opposite their names: Joseph Davidson, \$100; Frank Baker, \$100; Sam Prager, \$100; El Conroy, \$75; P. L. Deane, \$75; M. L. Glower, \$75; M. L. Parcells, \$75; James Watson, \$75; Sam Wells, \$75; R. F. Sepulveda, \$75. Laid over.

The City Auditor presented his weekly report of the condition of the several funds of the city. Finance Committee.
The Mayor presented the bond and contract of the Manchester Locomotive Works for a new fire-engine. Referred to the Fire Commission.

The Mayor returned without his approval of the bond and contract of D. P. Doege for sprinkling the streets, on the grounds that the bond was insufficient and the contract defective as to form. Referred to Board of Health.

The Zanjero presented a weekly pay roll amounting to \$31. Finance Committee.

UNFINISHED BUSINESS.
A communication from I. W. Hellman, withdrawing petition for a change in the franchise of the City Street Railroad company. Finance Committee.
From E. F. Spence to withdraw a petition for a change in the franchise of the Central Street Railroad Company. Granted.

From the East and West Los Angeles Street Railway to change franchise from single to double car track. The City and Central Street Railway Companies in a communication stated that they had made arrangements whereby the cars of the East and West line could run cars over the tracks of the City and Central companies. Filed.
The Charity Street Cable Road asked a franchise to construct a double track narrow gauge road, beginning at Seventh and Charity, thence easterly along Seventh to Fort, thence northerly along Fort to Temple. Referred to the Board of Public Works and City Attorney.

THE CHARTER.
The committee to which was referred the Knox bill presented a charter, which was read and adopted.

The committee further recommended that a committee of three, consisting of the Mayor, City Attorney and a citizen be sent to Sacramento to confer with other delegations and to take such steps as are necessary to perfect a charter for the city. So ordered, and Mr. B. Cohn appointed as the citizen on the committee.

Mr. Frankensfield moved that a warrant for \$30 be drawn on the City Treasury to defray the expenses of the committee. So ordered.

Council then adjourned until 2 o'clock this Tuesday afternoon.

THE CHARTER.

Synopsis of the Act as Recommended.

Following are some of the important provisions of the new charter as reported by the Charter Committee and adopted by the Council yesterday. There are many changes from the bill as introduced by Mr. Knox. The officers of the city are to remain as now with the addition of a Police Judge to be elected by the people. The Boards of Police Commissioners and Fire Commissioners are combined and will now consist of one body of five members under the name Police and Fire Commissioners. A general municipal election is to be held on the first Monday in December, 1888, and on the first Monday in December every two years thereafter. At the first general municipal election all of the elective officers of the city shall be elected, and one from each of the even numbered wards, and the Councilmen elected at the first election to draw lots for the long and short terms as follows: The odd numbered wards to draw for one member in each to serve for two years, and two members in each to serve for one year, the even numbered wards to draw for two members in each to serve for two years and one member in each to serve for one year.

In December, 1889, there shall be eight Councilmen elected, for a term of two years as follows: Two members from the First Ward, one from the Second, two from the Third, one from the Fourth, two from the Fifth. In December, 1890, there shall be seven Councilmen elected to serve for two years, as follows: One from the First Ward, two from the Second, one from the Third, two from the Fourth, one from the Fifth. So that at each election thereafter, in the odd years, there shall be elected eight Councilmen, two from each odd numbered ward, and one from each of the even numbered wards, and in elections held in even years vice versa.

SALARIES AND BONDS.
The following salaries of officers are fixed: Mayor, \$2500 per annum; City Treasurer, \$1500 per annum; City Assessor, \$2500 per annum; City Auditor, \$1500 per annum; City Tax Collector, \$2400 per annum; City Police Judge, \$2400 per annum; City Justice, \$2000 per annum.
The bonds required are as follows: Mayor, \$10,000; City Assessor, \$5000; City Auditor, \$10,000; Tax Collector, to be fixed by Council; City Assessor, \$10,000; City Treasurer, to be fixed by Council. The salaries of other officers shall be fixed by Council.

DUTIES OF OFFICERS.
The duties of the city officers remain as now fixed. The new officers, Clerk of Council and Police Judge, have the following duties: The Clerk of Council is to keep a record of the proceedings of the Council; the Police Judge shall have exclusive jurisdiction of all proceedings and prosecutions for violation of any ordinance of the city, of all misdemeanors under the statutes of the State pun-

ishable by fine or imprisonment, of all proceedings for security to keep the peace. The Police Judge is also to have the same jurisdiction and power as a Justice of the Peace in all actions and proceedings. The Police Judge shall have a clerk, who shall give \$1000 bonds, and he shall have power to accept bail, administer oaths and do every thing that the Judge is required to do, except try a case. The Judge and his clerk shall hold court from 8 A. M. to 5 P. M.

SEWERAGE.
Following is the full provision of the new charter concerning sewerage, which is a change from the old charter and is very important:

Section 1. The Council shall, through its City Engineer, prepare and complete by maps, profiles, charts and such other data as shall clearly set forth the position and capacity of all mains and sewers, and a system of sewerage to be adopted by the Council of said city, and when so adopted no change shall be made and no deviation from said system will be allowed unless upon a two-thirds vote of all members of the Council, and the approval of the Mayor of said city.

Sec. 2. All maps, profiles, books, records and other data pertaining to this system shall be fully indexed, and when accepted by the Council of said city shall be filed in the office of the City Engineer, but shall be open to public inspection.

Sec. 3. The Council shall have power to lay down and cause to be laid down all necessary sewers and drains, repair and cause to be repaired the same, and, except as hereinafter provided, to assess and levy and collect in this article provided for all real property benefited by such sewers or drains, its proportionate share of the cost thereof.

Sec. 4. The Council shall by bonds of the city issued for this purpose, pay the cost of constructing sewers, provided, an assessment and levy may be made, on all property benefited. The Council shall determine the mode and manner of making all assessments, levies and collections to pay cost of constructing sewers.

EDUCATIONAL.
Section six of the article on Board of Education provides that no money shall be paid from the common school fund for the maintenance of any class or school above the grammar grade and instruction must be given in the following branches and no other, in the several grades in which such may be required, viz: Reading, writing, orthography, arithmetic, geography, grammar, history of the United States, elements of physiology, vocal music, elements of book-keeping and industrial drawing.

Section seven provides that the said Board of Education is required to give the first consideration to the maintenance of schools of the primary grades, and see that ample facilities are given for the accommodation and instruction of pupils in such primary grades, and in no case shall the consideration and interests of the primary and intermediate grammar grades be sacrificed to the interests of the higher grades.

POLICE AND FIRE COMMISSIONERS.
This Board shall consist of five members, one from each ward, to be appointed by the Council and to hold office for four years. The Mayor is to be ex-officio President of said Board but shall have no vote. The sessions of the Board shall be public. They shall have a clerk. The Board shall appoint policemen and firemen but no appointment shall be made for political reasons.

The Board shall make rules for the government of the Police and Fire Departments, and shall estimate the expenses. It shall have charge of the property of both departments. It shall approve all claims. The Police Department shall consist of a Chief, a Captain and thirty policemen. The Fire Department shall consist of a Chief Engineer and as many assistant engineers, firemen, firemen and drivers, not to exceed seventy, as the Board may determine. The Board may increase the number of policemen and firemen in its discretion. All officers and members of the Police and Fire Departments shall hold their positions during good behavior and until removed for good cause affecting their official character or competency.

BONDS.
The Council may, at any time, submit a proposition to incur an indebtedness for any specific purpose, to a vote of the people. (The charter makes no limit to the amount of indebtedness to be incurred. If the vote is favorable the Council may issue interest-bearing bonds to any amount, for the purpose specified.)

STREETS.
The article regarding streets is not materially altered, and provides that the Council may at any time order the improving of any street, including paving, and compel the property owners to bear a proportionate share of the expense.

The committee to go to Sacramento, consisting of Mayor Workman, City Attorney Daly and Mr. B. Cohn, will possibly leave to-morrow.

A-Safeguard.

The fatal rapidity with which slight Colds and Coughs frequently develop into the gravest maladies of the throat and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYER'S CHERRY PECTORAL. Nothing else gives such immediate relief and works so sure a cure in all affections of this class. That eminent physician, Prof. F. Sweetzer, of the Maine Medical School, Brunswick, Me., says: "Medical science has produced no other remedy so expectorant so good as AYER'S CHERRY PECTORAL. It is invaluable for diseases of the throat and lungs."

The same opinion is expressed by the well-known Dr. L. J. Addison, of Chicago, Ill., who says: "I have never found, in thirty-five years of continuous study and practice of medicine, any preparation so great as AYER'S CHERRY PECTORAL, for treatment of diseases of the throat and lungs. It not only breaks up colds and cures severe coughs, but is more effective than anything else in relieving even the most serious bronchial and pulmonary affections."

AYER'S Cherry Pectoral

Is not a new claim for popular confidence, but a medicine which is to-day saving lives, and into being since it was first offered to the public.

There is not a household in which this invaluable remedy has once been introduced where its use has ever been abandoned, and there is not a person who has ever given it a proper trial for any throat or lung disease, susceptible of cure, who has not been made well by it.

AYER'S CHERRY PECTORAL has, in numerous instances, cured obstinate cases of chronic Bronchitis, Laryngitis, and even acute Pneumonia, and has saved many patients from earlier stages of Pulmonary Consumption. It is a medicine that only requires to be taken in small doses, is pleasant to the taste, and is needed in every household where there are children, as there is nothing so good as AYER'S CHERRY PECTORAL for treatment of Croup and Whooping Cough.

These are all plain facts, which can be verified by every one, and should be remembered by everybody.

The Sacramento Bee opposes a bill before the Legislature to give the Superintendent of State Printing a deputy. One of the reasons the Bee assigns for its opposition is the fact that the late Superintendent got along with a bookkeeper, and managed to be absent for several months at the East and in Europe, without leaving a deputy to represent him. But the Bee does not know that it is really the experience of the former Superintendent that caused the drafting and the introduction of the bill. Superintendent Ayers was compelled, in order to carry out his duties, to absent himself not only when he went East, but on many other occasions; and the difficulties of carrying on the business during these necessary absences by a man doing the duties of a deputy without having the power conferred by the law upon deputies, showed the absolute necessity of the passage of this bill, which was drafted by the late Superintendent himself.

The Los Angeles delegation and other members of the Legislature have presented the name of J. Downey Harvey for a position soon to become vacant in the Board of Fish Commissioners. The selection of Mr. Harvey by Governor Bartlett would be a good one. Southern California has not had its full share of attention from the Fish Commissioners, although we have many lakes and streams that would furnish a fine supply of food and other fish, if they were stocked. The three Commissioners now acting are all appointed from the northern part of the State, and consequently the Sacramento and San Joaquin rivers and their tributaries, and the lakes in that section, have alone arrested their attention. Governor Bartlett will do the fair thing by this important part of the State if he will make the appointment our delegation and other Southern California legislators ask for.

The situation in Montana Territory is becoming alarming. The whole country seems to be locked in by snow, the roads being impracticable and prices for fuel and other necessities having gone up to famine rates. The thermometer, in the meantime, marks as low as 60 degrees below zero, and many deaths have occurred from freezing. Yet the severity of the season has only commenced, and it is feared that this will be a winter of casualties from its rigors surpassing anything ever before known in the Territory. Already the sum of deaths from freezing surpasses that of any winter in twenty-five years. California is, indeed, a favored land when contrasted with the inclement States and Territories the other side of the Rockies.

When the present rainstorm spends its strength and a few days of clear weather have supervened, the country will become "a thing of beauty." The lush grass will gladden our sun-kissed hills, and the prearcent god will "Purgle all the ground with vernal flowers." Everywhere the eye will rest with delight upon Nature's verdant garb. Our glorious rains are the welcome harbingers of a prosperous year, and from them will spring every choice gift that adds to the substantial comfort and the esthetic pleasure of the happy mortals whose lives are cast in this favored portion of our land.

The strain is becoming daily more tense in the situation between France and Germany. The war spirit keeps pace with the efforts of each of these powers to increase their military armaments. This condition cannot long continue without a rupture. The first faux pas committed by either power must necessarily lead to serious trouble. The excited state of the Paris Bourse is a significant sign of the fermentation going on in both countries.

THE OBSERVATORY DOME.

Completion of the Monster Steel Structure.

Upon the wharf of the Union Iron Works stands a huge and novel structure. In shape it is a perfect half-sphere, with a diameter of seventy-five feet. Its massive steel-curved ribs and the generally monstrous appearance of the affair excite the curiosity of all who pass by the works. The structure is the dome of the Lick Observatory, just completed, which will be shipped to Mount Hamilton in the course of three weeks. The steel sheathing for covering, although cut in proper lengths, will not be put on until the dome is erected at the observatory. As stated, the diameter is seventy-five feet, or thirty-seven and a half ft. from the zenith of the base. The entire dome rests upon wheels and may be made to revolve about on a plane. The dome without the floor, which is not connected with it, weighs ninety tons, yet a man with one hand may turn it about with ease. The power supplied is a water engine. The floor is a separate portion of the mechanism. In observatories at present the observer sits in a chair, which by means of a screw he may raise or lower, according as the telescope is pointed toward the zenith or horizon. As the distance that the chair must be elevated in the comparatively small telescope now in use is only six or eight feet, the plan was convenient, but in the monster Lick telescope the observer in taking observations from horizon to zenith must rise seventeen feet; consequently the plan was invented of raising and lowering the entire floor of the dome. The floor weighs twenty-four tons, but so nicely is it poised with balancing weights that to rise or drop it requires little more exertion than to hoist an elevator. Extending from the circumference to the zenith and ten feet beyond is a slot in the covering ten feet wide, along which the telescope will move. This slot is closed by steel plates, which open or shut like folding doors. The dome will be taken down and shipped in sections.—[S. F. Chronicle.]

Have our Eastern neighbors, who are here in such large force, brought with them Eastern meteorological conditions? Thunder and lightning are new phenomena to us, but to our Eastern friends we suppose that last night's storm, with its salvos and electrical accompaniments, made them feel quite at home.

TILDEN AND HENDRICKS.

Ex-Congressman Lamb Describes Their Last Meeting.

Among the gentlemen present was the Hon. John S. Lamb, for whom Mr. Hendricks always had a warm feeling and who knew more, probably, of the Vice-President than any other person. All had given some reminiscences of the one time when they were together, a gentleman, addressing Mr. Lamb, said: "John, I understand that you were at the last meeting between Mr. Tilden and Governor Hendricks. Tell us something about it."

Most persons will remember the meeting referred to. It was a short time previous to the Democratic National Convention at Chicago at which President Cleveland was nominated. The names of Tilden and Hendricks were upon every man's lips, and it almost went without saying that they would be the nominees of the Democratic party for President and Vice-President. Mr. Hendricks was known to be favorable to the idea. He had just returned from Europe, where, he was reported, he had been negotiating with the Government of the Netherlands for the purchase of a large tract of land in the Netherlands. The evening following his landing at New York Mr. Hendricks called upon Mr. Tilden at Gramercy Park. When requested to tell of that meeting Mr. Lamb at first hesitated, but throwing himself back in an easy chair, musingly replied:

"Yes, I was at that meeting and I am the only person living who saw what took place or who heard the conversation. There were but three—Governor Hendricks, Mr. Tilden and myself. They were both dead. I almost went without saying that they would be the nominees of the Democratic party for President and Vice-President. Mr. Hendricks was known to be favorable to the idea. "What is Woman Worth?"

Asked fair damsel of a crusty bachelor. He did not know, so she said: "W. O. man" (double you, O man). But a woman feels worth little if disease has invaded her system and is daily sapping her strength. For all female weaknesses Dr. R. V. Pierce's "Favorite Prescription" stands unrivaled. It cures the complaint and builds up the system. Send ten cents in stamps for pamphlet to World's Dispensary Medical Association, 663 Main street, Buffalo, N. Y.

Pierce's "Pleasant Purgative Pellets."

Use the great specific for "cold in head" and catarrh—Dr. Sage's Catarrh Remedy.

A Clear Complexion.

How can you expect a clear complexion when the blood is full of impurities and the stomach clogged? The blood becomes impure because the liver does not act properly and work off the poison from the system, and the certain results are blotches, pimples and eruptions. Purify the blood with Simmons' Liver Regulator, and regulate the liver, stomach and bowels, and then the skin will become clear.

Cure for Piles.

PILES are frequently preceded by a sense of weight in the back, loins and lower part of the abdomen, causing the patient to suppose he has some affection of the kidneys or neighboring organs. At times, symptoms of indigestion are present, flatulence, uneasiness of the stomach, etc. A moisture like perspiration, producing a very disagreeable itching, after getting warm, is a common attendant. Blood, bleeding and itching piles yield at once to the application of Dr. Rossen's Pile Remedy, which acts directly upon the parts affected, absorbing the tumor, allaying the intense itching, and effecting a permanent cure. Price 50 cents. Address the Rosanko, Medicine Co., Piqua, O. Sold by E. F. Heinemann.

Thousands of Consumptives

Have received benefits from Green's Lung Restorer, Saline Aids, an invaluable preparation for Coughs, Colds and all affections of the Throat, Chest and Lungs. Not a secret compound made from Absorbent Balsam and Mountain Balm. Physicians, Ministers, Vocalists and Public Speakers acknowledge it the King of Cough Cures. For sale by C. H. Hance.

LADIES, life and health worth preserving? If you think so, use Gilmore's Aromatic Wine. C. F. Heinemann, agent, Los Angeles.
